CROP TESTING PLAN

Four radio broadcasts dealing with better seed and crop improvement will be given by Mr. H. G. L. Strange, Director of the Crop Testing Plan, as follows:
Tuesday, Feb. 18th.—The use of rusted and frosty grain for seed.
" Feb. 19th.—The standard varieties of wheat, oats and barley.
" Feb. 25th.—How to buy and use good seed.
" Mar. 3rd.—Cleaning and treating seed—use of the fanning mill.

TIMES OF BROADCASTS:
C I G X—YORKTON . . . 2.00 to 2.10 p.m.
C F A C—CALGARY . . . 12.15 to 12.25 p.m.
C I C A—EDMONTON . . . 1.05 to 1.15 p.m.

Funeral of Mrs. Young.

The funeral took place in Edmonton, on Friday last, of Marjorie Jean, beloved wife of Mr. Clifford W. Young, of Stony Plain. Deceased had passed away in an Edmonton hospital, following a short illness.

She leaves to mourn her loss her husband; 2 children, Alan and Patricia; her parents, Mr and Mrs L. Mellich; 1 brother, Gordon; 1 sister, Margaret.

The funeral service was held in the Funeral Chapel, 112th St. and Jasper. Interment was made in the Edmonton cemetery.

Walther League Conference.

The North Alberta branch of the Walther League in connection with the Lutheran church held its annual winter conference in Edmonton, with all day sessions on Saturday and a concluding session on Sunday afternoon. Delegates from young people's societies in Edmonton and surrounding districts were in attendance, with a good representation from Stony Plain.

Addresses were delivered by Prof A H Schwermann on "Bible Study"; Rev J Herzer, on "With Christian Publicity"; and Teacher W Rosnau on "With Christian Sociability."

A banquet was held at the Royal George at the Saturday supper hour.

Movie-Talkies Coming.

It is quite some time now since we've had a movie picture show in Stony Plain, so movie fans will no doubt be pleased to learn we're to have a regular talkie movie festa in Kelly's Hall next week.

Commencing on Monday, March 2d, which is John Deere Day, there will be a double feature shown. "Sheppard & Son" will be the feature film. The second picture, which is said to have lots of fun in it, is "Murphy Delivers The Goods."

Tuesday, March 3rd, is Massey-Harris Day, when the talkie-movie film "Modern Engineering Transforms Farm Machinery" will be shown, starting at 1 o'clock. Following this film, The International Plowing Match will be put on the screen. Free lunch provided for farmers and their families. "Be sure and bring the Boys." A prize will be given to the lucky ticket holder. This get-together meeting will feature 3 new Tractor Models and the Massey-Harris line of one-way discs for 1936.

Tax on Bachelors! What Next

The levying of a bachelor tax on all bachelors over 25 years of age was proposed in the Legislature last week by J W Beaudry, the Social Credit member for St. Paul. Mr. Beaudry said he hoped there were none in the Assembly in this category. How it O. Manning was the chief opponent of the levy, but Foster of Didsbury, King of Cochrane, and Anderson of Calgary were also found on the bachelor list.

Safeguarding Democracy

"If our democracy is to survive, the whole voting public must be educated, not as to use the rational, scientific mode of approach to all our problems, instead of the emotional, superstitious and 'hasty' mode of approach."

When Dr. Robert Millikin, eminent American physicist and scientist, made this statement recently in a letter read at a congress of the American Institute in New York, he said a great deal in a few words, and while, no doubt, he had social and economic problems as they exist in the United States in mind nevertheless the philosophy contained in his words is equally sound and applicable when considered in the light of the problems and conditions which confront the people of this country.

For no matter what problems exist, and without any limitation of their geographic or ethnologic application, it is axiomatic that they cannot be solved satisfactorily unless the ray of clear reason and logic is focused upon them rather than a diffused floodlight of passion and emotion. In other words, it is only after the problems which cry aloud for solution have been placed under the microscope and subjected to scientific analysis to determine what they are made of, that it is possible to prescribe an effective cure.

If, on the other hand, people allow their emotions to run away with sober reflection and sound judgment, no matter how laudable those emotions may be, no matter how fine even the impelling motives, it is a sine qua non, that the confusion reached will sink them out of the wrong and the goal to be achieved further removed and subsequently more difficult to attain. For misdirected effort surely leads to more complicated and most undesirable consequences.

In their turn undesirable consequences can do nothing but promote unrest, dissatisfaction and despair, and when these moods have been induced people are apt to turn to anything that offers in the hope of finding relief, even to the extent of surrendering liberties which have been bought at great cost.

All this, no doubt, Dr. Millikin had back of his mind when he wrote his dictum that the existence of democracy is threatened for the peoples who fail to apply science and reason to the solution of their problems.

This does not by any means contradict the assertion that sentiment and emotion have their part in determining the destinies of individuals and nations. Indeed, not only have they a part to play, but without these forces the world would be a sorry sphere, but they require as a governor, rational thinking and logical decisions, so that they may be directed along right and useful channels.

Once rationalism has pointed the way to the solution of the problems which vex the soul, then is the time to call into play the finer emotions of burning zeal and enthusiasm to enkindle others, and it is a safe assumption that causes lighted from the beacon of incontrovertible fact and entrenched wisdom are those which will ultimately prevail in the minds and hearts of the multitude.

The people of Western Canada have at times been accused of being too easily swayed by popular and ephemeral concepts and of swinging to extremes. If there is any truth to the accusation, it is equally true that they are not more prone to do so than the peoples of other lands. For proof, it is only necessary to take note of what is happening in other countries.

Moreover, if at times, the citizens of this country, display an occasional tendency to soar to impractical heights, as they do in other countries it is noticeable that free ventilation and discussion eventually slows down the pendulum to a point where questions can be considered rationally, a tribute to the value of free thought and free speech, rightly regarded as the bulwarks of democracy.

And in this connection it is interesting to note that Dr. Millikin also stated that he regarded the newspapers as "on the whole the most effective adult educational influence in this country," coupling this with his comment on the necessity of resorting to reason if democracy is to survive.

This statement needs very little amplification, for it is universally recognized that the newspapers of this country devote a great deal of space to the publication of discussions by authorities and others on important social and economic problems and also to announcements of discoveries of value to mankind generally.

Power Of The Moon

We are of the opinion says the Mayfield, Kentucky, Messenger, that the sun and the moon and other bodies in our ethereal universe do have some control over things on earth, and even on human beings. If the moon can control as big a thing as the Pacific or Atlantic oceans, surely it could have some effect on a crop of potatoes, or corn, or even a human being.

By Way Of Contrast

Of George V. it can be said that he died in peace, loved by his people. A king, says the New York Post, could ask no higher praise in an age that has seen three emperors de-throned, several kings assassinated or exiled and dictators ruling by terror—the dictators themselves terrorized by fear of what their subjects would do to them if they ever got the chance.

Believed Link With Hittites

Relic Found In 4,000-Year-Old Tomb In Asia Minor

What is believed to be the first step toward the discovery of the lost Hittites, who appear in the Bible as a great imperial power, has just been found in Asia Minor. In a 4,000-year-old tomb was discovered a Hittite statue of a bull, seven inches high and inlaid with gold. The silver smith's art is astonishingly modern, and indicates that the race was cultured rather than primitive as previously believed. The discovery has aroused great interest among European archaeologists because previously nothing had been known of the Hittites' work except rock carving and a few pithers. The relic was exhibited recently in London.

A Rare Operation

Blood Sponged From Patient's Lung Used For Transfusion

A rare operation in which the victim of a stab wound in the heart was saved by his own blood was reported in the Journal of the American Medical Association. The blood was sponged from the victim's lung cavity, and was then injected into his veins in a manner similar to the usual transfusion. Two Pittsburgh physicians, who described the case for the Journal—Dr. Charles M. Watson and Dr. James R. Watson—said it was the first of its kind in medical annals.

WAKE UP YOUR LIVER BILE

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Bile enters your system. You get constipated. Bile enters your system. You get constipated.

A mere bowel movement doesn't always get it at them. You need something that works on the liver as well. It takes those good old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Bile enters your system. You get constipated. Bile enters your system. You get constipated.

Ask for Carter's Little Liver Pills by name. Don't let anyone else sell you the same.

An Unusual Problem

Man In Bohemia Must Prove He Is Alive

Unless Robert Guenzel of Zatec, Bohemia, can prove he is alive, his "widow" must pay death taxes on her "late" husband's estate. When Mrs. Guenzel received the demand for the death duties Guenzel went to the tax office and protested that he was alive. The officials agreed that there must have been some error in their records, but pointed out that they were in no position to make the necessary correction unless Guenzel could produce a certificate proving that he really was alive. The fact that the parish church at which Guenzel was baptized and married did not mention his death in its register was not accepted as proof that he was living.

Declaration In Autumn

King Will Take Oath To Maintain Protestant Religion

The king is expected to subscribe to the accession declaration in the autumn. This oath ensuring the maintenance of the Protestant religion by the crown, must be made by the sovereign on the day of the meeting of the first parliament after accession or at the coronation, whichever comes first. Before the coronation parliament will probably enter the new session. Therefore the declaration will be "made, subscribed" and "audibly repeated" by the king at the opening of the new session.

Lasts For A Lifetime

New Lead Pencil Requires No Sharpening Or Refills

Perhaps it was years of experience in the school room that inspired Wynn E. Eisenhauser, of Halifax to invent a lead pencil that can be used a lifetime without refills or sharpening. Eisenhauser, secretary of the Maritime Teachers' Bureau, has constructed just such a pencil and it is the basis of a patent issued by the United States patent office at Washington.

It is estimated that there are approximately 20,000 Mohammedans in North America.

DIXIE gives you a long cool smoke... And it's always FRESH in the plug.

SELECTED RECIPES

DINNER ROLLS

2 cups Basic Sponge
1/2 teaspoon salt
1 tablespoon sugar
4 tablespoons melted shortening
1 egg well beaten
4 cups flour (approx.)
1 cup milk

To the Basic Sponge, add salt, sugar, shortening, milk and egg. Stir well and add flour enough to knead smooth. Cover well and allow to stand in warm place until double in bulk (about 1 1/2 hours). Knead and form into rolls. Place apart on greased pan and allow to rise until double in bulk. Bake in hot oven for about 25 minutes.

Highway Crossing Accidents

Collisions Between Automobiles And Trains Show Increase

Accidents at highway crossings in 1935 involving collision between motor vehicles and trains totaled 213 compared with 182 for 1934, a report of the board of railway commissioners announced.

Of the 1935 figures, 61 accidents were instances in which motor vehicles ran into sides of trains, involving 13 persons killed and 90 injured, compared with 55 accidents of a like nature in 1934 in which seven were killed and 76 injured.

Will Study Rheumatism

Dr. A. A. Fletcher of Toronto was elected president of a national society for study and control of rheumatism constituted at Ottawa at a meeting of physicians from many parts of the country. Dr. Frederick Cadman, Manitoba, bacteriologist, was named second vice-president.

Artificial lemon oil is on the market.

Small Military Force

The smallest British military force in the world is located on the Pacific islands of Gilbert and Ellice. The Ocean Island Defence, as it is known, consists of one officer and 20 "other ranks".

RHEUMATISM DRIVEN OUT!

It should be realized Rheumatism is not inevitable if the poisonous acid fluids of the system are kept on the move, thus preventing the formation and deposit of painful crystals in the joints.

The solvent stimulating action of Phosferine has a mastery effect in liquefying, dispersing and expelling the harmful acid crystals and it recharges the tortured and exhausted nerve centres with the energy to restore ease and movement to the stiffened joints, and supplants to pain rigid muscles.

This exclusive property of Phosferine is illustrated by the recent experience of Mrs. B. Brewster, who writes: "For months my husband was in terrible pain with rheumatism in his feet, walking with agony, until he tried Phosferine, and now all his rheumatic pain has gone, and he says it is wonderful to walk without any pain." 6, Greek Street, Hull.

The speedy expulsion of Rheumatism is something to be thankful for—start from the saving in time and money, for it means that Phosferine has revitalized the body cells, regulated the blood pressure, strengthened the stomach and circulation, and maintained perfect health, and many happy returns of Activity!

AFTER EVERY MEAL

at the FIRST SIGN of a COLD take Groves' Laxative BROMO QUININE

Groves' does the four things necessary to kill a cold quickly; opens the bowels, combats the cold germs and fever in the system, relieves the headache and "grippe" feeling, tones up the entire system. At all Drugstores. Ask for Groves' They're in a while too.

Evergreens Recommended As Best Shelter Belt For The Prairie Farm

Late winter is the ideal season for studying and planning farm home improvements, because it is possible to observe the outside features of the general layout and the effects of winter storms and drifting snow around the yard and farm buildings. At this time it is easier to discern the places in the general view most vulnerable to the weather which will suggest a plan for the proper disposition of shelter belts and wind breaks to minimize the discomforts associated with the long winter period.

From a protection standpoint, the broadleaf shelterbelt has its greatest value and serves a wider purpose during the full leaf period. Through the late fall and winter months, however, its protective influence is considerably reduced and there is need for a more substantial planting for winter effect. To this end a very effective barrier to winter winds may be provided by a judicious and careful planting of evergreens.

Two or three rows of these as a separate planting or to supplement the existing broadleaf belt will give considerably more winter comfort around the farm yard than several rows of broadleaf trees. In fact, they will form an impenetrable wall through which no wind can penetrate. When all other trees are bare and leafless, the evergreens stand out in bold pleasing relief, giving very substantial protection and a sense of home comfort around the place.

There are not enough evergreens on the farms of the West. Certainly, not as many as there would be if farmers only realized how well they can be grown and how valuable they are to the farm home site. For beauty and ornament there is really nothing that adds to the cheerfulness and comfort of the outside view in the winter months like a generous planting of evergreens. They have an all-year round usefulness and in winter when there is no other green thing in sight the value of a good evergreen windbreak is considerable.

Evergreens to supplement existing broadleaf plantings are recommended for every farm. Once established they are more resistant to disease than many of the broadleaf trees and they can be successfully grown on practically all types of soil, provided it is not too alkaline. While there are several dual purpose varieties suitable for ornamental effect and general planting, the native white spruce and the introduced hardy strains of Scotch Pine are the most desirable for shelter belt purposes.

The opinion is often expressed that evergreens are too slow growing and hard to start. Evergreens do grow slowly while young but when they have reached a height of three to four feet their growth is quite rapid and then from 12 to 24 inches of new growth yearly may be expected. They are not hard to start provided certain methods of handling are followed. The small fibrous roots are extremely sensitive to the least exposure to sun and air, and for this reason, both before packing for shipment and again after planting, the roots should be immersed in a mixture of soupy mud to prevent any chance of drying out which would be fatal and which is probably one of the main causes of young evergreen failures. Then after planting, the trees will require some protection especially in soil drifting areas to prevent damage to the tender young needles by soil particles.

In the early spring months young evergreen will undoubtedly suffer injury from unseasoned due to sudden changes in day and night temperatures when warm days induce sap activity and cold nights or freezing temperatures rupture the leaf cells. A good snow cover will prevent this damage to a large extent but it is advisable to place a wire of straw or brush, a shingle or similar screen to provide shade on the south side of the trees. This is a very important procedure for at least two seasons after planting.

Cultivation during the growing season must be frequent, thorough, and in all cases shallow. Evergreen roots are fairly close to the surface and deep cultivation will quickly destroy the fibrous feeding roots. Watering is not usually necessary except during very dry spells when a thorough soaking at intervals is preferable to frequent applications of small quantities.

In addition to the possibility of sun scalding in the young growth stage, evergreens are often subject to rabbit injury. Fencing against this pest is not altogether practical on a large scale and is quite expensive. As a protection against both sun and rabbits the use of building paper or burlap, wrapped around the small trees in the late fall, is recommended for the first three years. If there is a good snow cover, only the exposed growth will require this protection. This protection should, of course, be removed each year as soon as settled spring weather sets in.

More evergreens have died in drought years from the ravages of insect infestation than from actual lack of moisture. Trees that develop a sickly and discolored foliage appearance are in all probability the victims of insects. These insects and their control may be described as follows:

Spider Mite—Is very minute in size, forming a webbing among the spruce needles. Its presence is associated with a brownish discoloration of the needles, controlled by spraying about the middle of May first with a strong pressure of water to wash off the webbing, and by a thorough spraying with an insecticide consisting of one pound dry lime sulphur to 18 gallons of water.

Pine Leaf Scale—Minute white scales common on the needles of Spruce and Pine. Larvae emerge about the first week in June and a spray of one pound dry lime sulphur to 18 gallons of water is effective at that time only.

Spruce Sawfly—Larvae a yellowish green with reddish brown head which appear about the second week in June and remain until about the middle of July. These larvae are very heavy feeders and a heavy infestation will quickly defoliate a tree. However, their depredations, if noticed in time are easily controlled by spraying with the following solution: Two pounds of lead arsenate and 1 1/2 pounds of hydrated lime to 40 gallons of water.

The above are probably the most common and destructive enemies of Spruce and Pine occurring in the prairie provinces at the present time. Samples of shoots from trees suspected of infestation should be forwarded to the Entomological Laboratory at Indian Head, Sask., for proper identification and advice on control.

Has Few Chimneys

Honolulu Does Not Often Build Them On Houses

Because there are almost no chimneys in Honolulu, an intelligence test given to school children recently proved to be not so intelligent. One of the exhibits was a house without a chimney. "What is wrong with this house?" was the question. Only one pupil answered correctly, and he was a boy from the mainland. Honolulu has fewer chimneys than any other city of equal size in the United States.

Rabbit Brought Luck

A piece of tin "mined" by a rabbit has brought luck to a prospector named Caldwell near Alice Springs, Northern Territory, Australia. While he was surveying the ground the rabbit threw up from its burrow a piece of tin, the size of a table-tennis ball. As a result Caldwell is becoming comparatively wealthy.

All steel articles can be preserved from rust by putting a lump of fresh burnt lime in the drawer or case in which they are kept.

The best thing to do with a cold is take it home with you and bed to bed.

Sea Safer Than Highway

British Ships Lose One Passenger To Sea Killed By Ours
There have been few ocean voyagers, say, for example, between Montreal and Liverpool, who have not on reaching their destinations cabled back to the folks at home: "Arrived safe; all well."

But ocean travel has become so safe with recent years that this routine formula seems almost a waste of money. Not since the Norwegian collier Storstad rammed the C.P.R. liner Empress of Ireland nearly 22 years ago in the Gulf of St. Lawrence, has there been any passenger shipwreck on one of the busiest routes in the world. People get on the ships at Montreal or Liverpool and expect to reach the other side as a matter of course. And they do; but invariably they send cable messages saying they have arrived safely.

The British Chamber of Shipping in a recent statement on the safety of ocean travel points out that it is two and a half times as safe as before the war, due to better navigation instruments, greater precautions and better weather data.

The Chamber states that British ships, after the high seas of navigation, are safer than those of any other nation, and that for every passenger life lost at sea 333 persons are killed on the highways in automobile accidents.

Our highways are much more dangerous than the highways of navigation. Yet nobody ever thinks of sending a telegram back home after a journey of 100 miles to say they arrived safe.

—St. Thomas Times-Journal.

Claim Baldness Inherited

Experts Give Report After Making Study Of Subject

Baldness is to a large extent due to whether or not a person's father or mother had, according to the findings of experts.

A study made by Ohio State University officials, reported in the magazine Human Biology, shows that baldness is transmitted from father to son.

"The sons of a bald woman will all be bald," is one of their findings. A woman never is bald unless her father was. When both parents are bald, the sons must all be bald, but some of the daughters may not develop baldness.

Baldness is more common in men than women and is generally transmitted directly from a father to half or more of his sons but only to an occasional daughter.

Frost on windows is no good sign that the air in a room is sufficiently moist.

Spain's attempt to make gasoline from grapes has failed.

Many Marvels In Plant Life That Scientific Theory Is Inadequate To Explain

Future Rests On Cooking

Urges Support Of Teaching Domestic Science In Schools

Canada's future rests on its cooking, Dr. C. T. Curry, director of the Royal Ontario Museum of Archaeology said. He urged support of domestic science schools. "We are a nation of dyspeptics," he said. "Others will drive us out if they have more energy. If we do not encourage a better diet, we will not hold the country. Food is the basis of all work."

Dr. Curry addressed the Ontario Vegetable Growers Association and corrected an impression gained from his speech that he declared women were lazy. He said women have to work just as hard these days as they ever did because in the old days women had more help.

A statement by Dr. C. T. Curry that "women are growing so lazy they won't make the effort to cook the family meal," brought an irate answer from Miss Agnes Macphail, woman member of parliament from Grey-Bruce and authority on cookery.

"There is a tendency to neglect the cooking of vegetables because of sheer laziness," Dr. Curry, Toronto archaeologist, said, adding women go to the corner store to buy prepared food and that the eating of the lazy forms of foods increased the danger of universal dyspepsia.

"Dr. Curry sounds as if he was suffering from a bad attack of indigestion himself," Miss Macphail said. "Our way most women cook two, three and even four varieties of vegetables for the midday meal in the summertime. A large salad is almost regulation menu for supper."

Canada's Furniture Industry

In Year 1934 Furniture Produced Worth \$17,159,000

The furniture industry of Canada produced \$17,159,000 worth of goods in 1934, according to Ottawa bureau of statistics figures. While there are 401 furniture makers in business in Canada, most of them are located in southwestern Ontario. Saskatchewan is listed with only one manufacturer in this line of business. The figures show Canadians demand more bedroom than dining room furniture, the production of the former being \$3,818,787 compared with \$1,683,718 for the latter.

The Transvaal is trying to stop competition between dog and horse race tracks.

Mammy Motifs Trim Small Linens

PATTERN 8354

Want to insure a gay, light-hearted breakfast-time? Then decorate your breakfast-table and curtains with these amusing Mammy motifs. If you'd see smiles take the place of blues. Easy and quick to do in five-to-the-inch cross stitch, the motifs are best done in gay colors on breakfast cloth and napkins, curtains, pillow, scarf or tea cloth. It's fun, too, to match them up with the companion Mammy towels, pattern 8280.

In pattern 8354 you will find a transfer pattern of four motifs averaging 6 1/2 x 8 inches, two motifs 3 1/2 x 5 1/2 inches, two motifs 5 1/2 x 4 1/2 inches, and four motifs 3 1/2 x 2 1/2 inches; color suggestions; illustrations of all stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. W., Winnipeg.

There is no Alice Brooks pattern book published.

In recent years some scientists have arrived at the conclusion that plants feel somewhat the same way that animals do. Gardeners, who know how some ferns are affected when some one brushes against them, will approve this decision. The old saying that flowers grow better in the garden of one who loves them has a basis in fact. Now the botanists are asking themselves, do plants think? According to an article by Dr. Raoul France, in the *Forster Lloyd*, of *Thapsus*, reproduced in the *Magazine Digest*, there is evidence to conclude that they do.

In the article mentioned reference is made to a eucalyptus tree whose roots spread over an area fifty feet square. The roots of the eucalyptus seek whatever was the course of the adjacent, and in the case cited the roots were barred by a wall that ran beside the canal. But this did not baffle the tree. One of its roots grew out of the ground and up the wall to a hole a few inches from the ground, went through it, down the other side into the ground and so made its way back to the brink of the canal. Did the tree do this blindly, or did it have some sense that instructed it that through the hole in the wall it could reach the needed water?

The extraordinary way in which plants grow has engaged the correspondence columns of John of London's *Weekly* for many months. The readers of this periodical have been supplying the curious with accounts of the unusual ways in which plants act, when faced with problems which must be solved if they are to continue to exist. One correspondent mentions a case that has a similarity to that of the eucalyptus tree. In a cave in the Midlands he saw the white roots of a tree, about 12 feet or 14 feet high, dangling from the top sill of the roof of the cave to reach the water at the floor. "How," he asked, "did these trees know the moisture was there so far away?"

People who have clipped hedges must have often come across an example of a plant's fight for life, similar to that recounted by another correspondent. At the bottom of his garden was an old-established privet hedge eight feet high and two and one-half feet through. One day, when he was about to trim it, he noticed a thistle bloom eighteen inches from the top of the hedge. He traced downward to the ground the smooth, green tube without trace of leaf or side-shoot. Not to be denied a "place in the sun" it had patiently pushed its "pipe line" upwards for some eight feet, having reached air and light, had reared all its thistle characteristics, still nourished through its "pipe line." The writer observes: "Surely it needs very little imagination to see some element of 'thought' on the plant's part in adopting such an expedient in unfavorable circumstances."

Space forbids the citation of any more of these interesting observations of plant life. But there is one fact about which the lawn owner may ponder. How is it that on a lawn dandelions and other weeds grow leaves that lie flat on the ground, while in the flower bed these same weeds thrust their leaves upward. Do the weeds anticipate the attention of the lawn mower? Whatever the answer, the facts demonstrate that in plant life there are marvels which recognized scientific theory is inadequate to explain.

Singing And Talking

Many Opera Stars Should Never Talk Over Radio

Some of the gravest offenders against good taste in enunciation are stars of the Metropolitan Opera Company, both men and women, who, in their own interests, ought never to be heard over the radio except when singing, because their speech voices are then to the public estate. This is a problem that broadcasting has developed, that of the "artfulness" of the voice is so many instances, a something that is not enhancing the popularity of the radio—Victoria Columnist.

If You Eat Starches Meats, Sweets Read This

They're All Necessary Foods — But All Acid-Forming. Hence Most of Us Have "Acid Stomach" At Times. Easy Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion... brought about by too many acid-forming foods in our modern diet. And that there is now a way to relieve this... often in minutes!

Simply take **Phillips' Milk of Magnesia** after meals! Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach!"

Try this just once! Take either the familiar liquid "PHILLIPS'" or, now the convenient new **Phillips' Milk of Magnesia Tablets**. But be sure you get Genuine "PHILLIPS'".

WORLD HAPPENINGS BRIEFLY TOLD

Dr. James H. Scarr, 69, who helped map Lindbergh's flight across the Atlantic in 1927, died recently in New York.

The Dominion government has loaned the province of British Columbia \$4,300,000 accepting a four per cent. treasury bill for one year as security for the loan.

A colony of wild bees was discovered in a hollow tree by Howard Woodley near Waterford, Ont. They had a store of honey which extended 11 feet and was estimated to contain 125 pounds of the sweet syrup.

An order for 334,000 pieces of glass and china, including 7,500 tea and coffee pots has been placed with a Liverpool firm for the liner "Queen Mary".

Alberta's first step to join other provinces in uniform legislation concerning life insurance is provided for in a bill containing 40 amendments to the Insurance Act, 1926, which received second reading in the legislature.

The Duke of York was promoted to higher ranks in all three defence services. The duke, now heir presumptive to the throne, was made an admiral of the fleet, a general of the army and air chief marshal in the Royal Air Force.

Albert E. Calnan, editor of the Picton Gazette, a weekly newspaper, died at his home after an illness of several weeks. He was a past president of the Canadian Weekly Newspaper Association.

The Health Restoring Value of COD LIVER OIL PLUS Easy Digestibility

Invalids struggling back to health need strength and vitality giving foods. SCOTT'S EMULSION is an emulsion of pure energy-packed Cod Liver Oil PLUS bone-building Hypophosphites of Lime and Soda. It is four to five times more easily digested than the highest grade Cod Liver Oil. These are PLUS VALUES you get only in SCOTT'S EMULSION.

Prehistoric Dragon Fly Wing Of Thirty-Inch Specimen Found In Kansas

A remnant of one of the world's largest insects, a prehistoric dragon fly about 2 1/2 feet long, was discovered in the limestone beds near Elmo, Kansas, by Dr. Frank M. Carpenter, of Harvard University museum of comparative zoology.

Only a part of one wing of the giant insect was found, but there was sufficient of this to accurately estimate the size of the entire specimen. Many other insects of this same family have been found previously in other parts of the world, so it was not difficult for Dr. Carpenter to estimate the size from the portions of the wing.

The giant insect was a member of a group known as Protodonata and lived in the Permian Age about 150,000,000 years ago. Insects of this type, with long thin bodies and thin wings, were the most powerful that ever lived and masters of the air in their time, scientists agree.

They were among the swiftest of insects and because of their great strength could cover great distances in one flight. They lived off smaller insects, as no birds or mammals lived in that age.

More than 8,000 prehistoric insects have been found by Harvard expeditions in these same limestone beds in Kansas, where they are unusually well preserved.

The only other insect ever found approaching the size of this specimen was uncovered in northern France about 50 years ago.

"Go West, Young Man"

New Novel, Recently Published, Should Make Strong Appeal To Western Readers

There have been few good novels about the kind of Canadians who comprise seventy per cent. of the population—the farm and rural people and the mass of "shirtleeve" city workers.

Such books as have been written have been mostly about farm life, although real farmers often have some difficulty in recognizing themselves!

So rural readers will give a warm welcome to "Go West, Young Man", a new novel by Bernard J. Farmer, which Thomas Nelson & Sons of Toronto have just published. For it shows accurately, excitingly, and yet poignantly, the experiences of a young man, fresh from the Old Country, tossed into the whirlpool of "unskilled labour" on which Canada's impressive cities feed.

Western readers will find it enlightening to get at first hand—embodied in a vividly written and exciting novel—the shift by which unskilled workers live. The hero of "Go West, Young Man" labours on railway section crews, sells all stockings from door to door in Winnipeg, works on construction gangs in Manitoba, and mines in Northern Ontario. He often starves but never whines, is often down but never out, and in the end achieves contentment in a modest job—with a modest, contented wife beside him.

The fact that so many incidents come from the personal experience of the author adds immensely to the book's value.

To Aid Night Driving Reflector Buttons Said To Define Shoulder Of Road

Ever have trouble keeping an eye on the edge of the road when an approaching automobile throws its headlights into your eyes? You wouldn't it driving along the Berlin Turnpike alongside Mount Lamentation.

The Connecticut state highway department has granted permission for R. O. Smith, New Haven insurance agent, to test his idea. It consists of small metal posts, set 120 feet apart, each with ten reflector buttons which throw back the lights of an approaching car and clearly define the shoulder of the road.

More Canned Fruit Imported "Imports of canned and preserved fruits into Canada in December were valued at \$101,683, almost double that of a year ago. The largest item was in pineapple from the Straits Settlements and Australia.

The moose can grow 78-inch antlers in three months. 2139

SUNDAY SCHOOL LESSON MARCH 1 VISION AND SERVICE

Golden text: He that abideth in me, and I in him, the same beareth much fruit. John 15:5b.
Lesson: Luke 9.
Devotional reading: II. Peter 1:10-21.

Explanations And Comments
The Vision on the Mount, Luke 9: 28-36. Taking with him his three favored disciples, the three who had been with him at the raising of the daughter of Jairus, and later were with him at the grave of Lazarus and in the Garden of Gethsemane, Jesus went up into the mountain to pray.

And as Jesus was praying, the fashion of his countenance was altered (Matthew says, "His face did shine as the sun"), and his raiment became white and dazzling. Let us not think of a splendor falling on him from without and lighting him up, but rather, as has often been said, of a glory coming from within, corresponding to something going on in his mind. We are told that the face of Moses shone after he had been in communion with God on the Mount, and we can readily understand that after hours spent in prayer Jesus would be exalted in spirit and a new light would shine from his countenance, his whole appearance being changed. John G. Paton in his autobiography speaks of the wonder and awe with which he and his brother would notice the beautiful light on their father's face as he appeared after a time of seclusion when he had been talking with God.

The Service On The Plain, Luke 9:37-43. On coming down the mountain to its base Jesus and the three disciples found a great crowd gathered there; among them were scribes, who probably had been trying to undermine the influence of Jesus during his absence. As Jesus approached, all hastened to him and a man in the crowd cried out: "Teacher, I beseech thee to look upon my son; for he is mine only child; and behold, a spirit taketh him, and suddenly crieth out; and it tearth him that he foameth, and it hardly departeth from him, bruising him sorely."

"Bring hither thy son," Jesus bade. Jesus healed him and gave him back to his father. See the account in

EVERYBODY LIKES Christie's Lorna Doone SHORTBREAD

Here's shortcake that rivals the finest you ever tasted. Baked to a light, tempting, delicious perfection from the finest and purest ingredients, Christie's Lorna Doone Shortcake is indeed a fresh delight. Buy it and try it today. All the family will like it and your guests will like it too.

Christie's Biscuits
"There's a Christie Biscuit for every taste"

Matthew 17. "And all were astounded at this grand display of God," Moffatt's translation.

Secure Rare Specimens

Asiatic Explorers Bring Collection Of Flora And Fauna From Tibet

Two Asiatic explorers are en route east with their collection of flora and fauna made in a recently completed two-year expedition into the one-time forbidden country of Tibet.

D. Dolan, explorer and research worker of the Philadelphia Academy of Natural Sciences, and E. L. C. Schafer, scientist of the Berlin zoological gardens, left Vancouver for Chicago and Philadelphia. They were travelling via Calgary and Winnipeg. Among the specimens they brought back are those of the wild yak and a full series of a large deer similar to the North American wapiti.

At present there is only one specimen of the yak, in Leningrad museum, and one of the deer species, in the British museum.

A Remarkable Machine

Photo-Electrithat Has Been Invented By Russian Engineer
A new photo-electrithat which can work to a complicated design without human aid has been invented by a Russian engineer, V. S. Vichman, who works at the Moscow Institute of Machine Tools and Instruments.

With the aid of a photo-electric cell the lathe can "see" any drawings that are placed in it. Then, it is claimed, the shaping instruments are automatically adjusted. Vichman's lathe has been adopted by the institute, which is now manufacturing others of similar design for use in industry.

ITALO-GERMAN ALLIANCE SAID TO BE IN PROSPECT

Rome. — An excellent authority said an understanding resembling the old triple alliance seemed to be taking shape, an eventuality which would place Benito Mussolini and Adolf Hitler side by side in a drastic revision of European alignments.

A possible Italo-German-Austrian agreement, this source said, was or is being discussed in both Florence and Berlin.

Following conversations in Florence between Austrian and Italian diplomats, Ulrich Von Hassell, Germany's ambassador to Italy, left by plane for Berlin.

Von Hassell held a long conference with Fulvio Suvich, Italian under-secretary for foreign affairs, who talked later in Florence with Egon Berger-Waldenegg, foreign minister of Austria.

(The old triple entente of Germany, Austria-Hungary and Italy was shattered during the Great War when Italy refused to fight for the central powers and later joined the allies.)

A possible agreement between Rome, Vienna and Berlin, it was learned, contains three main points.

1.—Germany and Austria would mutually lower tariffs considerably, almost to the point which would make a customs union.

2.—Germany would guarantee Austria's independence — of which Italy hitherto has been the guardian.

3.—Italy would admit the free development of pan-Germanism in Austria so long as it did not destroy Austrian independence.

Cope With Difficulties

No Other Generation Better Equipped Than The Present, Says Hon. R. B. Bennett

Ottawa. — No other generation than this had been better equipped by the inventive genius of man and the recorded experiences of their predecessors to cope with the difficulties of mankind, former prime minister Bennett told a gathering organized by the Junior board of trade of Montreal, making their second annual pilgrimage to the capital.

James S. Woodsworth, C.E.F. leader, recalled to the young men that in the pioneer days of Canada the policy was "paddle your own canoe." All that had been changed, he said, and now it was a case of "we are all in the same boat and we must sink or swim together."

J. H. Blackmore, leader of the Social Credit group, Hon. H. H. Stevens, representative of the Reconstruction party and Hon. C. H. Cahan, former secretary of state, were called on for brief addresses.

Mr. Stevens urged that boards of trade revive their boards arbitration to settle local industrial disputes.

Hoard Of Gold Seized

U.S. Secret Service Agents Make Haul In New York

New York. — Ten thousand \$20 gold pieces, greatest haul since enactment of the Gold Hoarding act of 1934, were seized by United States secret service agents. The gold, valued at \$338,000 at current prices, was discovered in the safety box of Zelik Josefowitz, described as a wealthy European.

The gold, said William H. Houghton, head of the raiders, is subject to confiscation. In addition, an alleged hoarder may be fined as much as \$10,000 and sentenced to 10 years in prison, and may be sued in civil court by the government for twice the amount of the hoard.

Ask Higher Tariff

Ottawa. — Representations have been made to the government to increase tariffs against baby chicks imported from the United States. Hon. J. G. Gardiner, minister of agriculture, told the House of Commons. The government has made no decision.

Ceylon has ordered that all business names be registered.

Six Killed In Snowslide

Survivors Of Accident At Gold Mine Had Terrible Experience

Manco, Colo. — A story of horror and suffering was told as the first survivors were brought through a blinding blizzard from the Hesperus gold mine, where six were killed and three injured by a gigantic snowslide.

Rescue parties, struggling on skis and snowshoes through a blizzard to the demolished wreckage of the mine buildings, met two of the injured survivors at the Red Arrow mine, about midway.

"It was a terrible experience," said Alvin Fink, 20-year-old mine employee. He was buried under the slide amid the wreckage of a building at the mine, situated above timberline at an altitude of 11,000 feet.

Fifteen persons survived the thundering mass of ice and snow that slid several hundred feet down a cliff and nearly wiped out the tiny mine settlement.

Kept Alive Three Years

Artificial Lung Used On Man With Atrophied Muscles

New York. — S. Crosby Halahan, 65, who had been kept alive for more than three years by artificial respiration, died Feb. 18 at Chiddingfold, Surrey, says a special despatch from London to The New York Times. All the muscles of his body gradually had become atrophied and in 1932 he became unable to breathe without artificial respiration.

The following year, Sir William Bragg, scientist, devised an apparatus of football bladders connected by a wide rubber tube, says The Times story. One bladder was tightly bandaged to Halahan's chest and the other, between two hinged boards, was worked by the feet like a bellows. Later an hydraulic apparatus worked by water was designed and used until Halahan's death.

Plot To Kill Selsaie

Discover Plane Of Emperor Had Been Tampered With

Addis Ababa. — Discovery of a plot to kill Emperor Haile Selsaie by tampering with his personal aeroplane led to an energetic investigation and manhunt in Ethiopia's capital.

Authorities said all clues pointed to an expert mechanic, or perhaps even an ace pilot, as the would-be assassin. Only a skilled hand could have damaged the imperial plane in a manner so certain to lead to disaster and yet so difficult to discover, they declared.

Investigators found sand mixed with the plane's fuel, and the motor cylinders and controls had been impaired in a way almost impossible to detect.

The plane almost certainly would have spun into a nosedive on its next flight, officials asserted.

Income Tax Bill

Ontario Taking From Municipalities Right To Levy Tax

Toronto. — Ontario's first income tax bill, taking from municipalities the right to tax incomes and placing the levy in the hands of the province, received second reading in the legislature after opposition speakers had tried without success to have the government announce its financial position.

The vote was 31 to 18 and the administration immediately moved for committee discussion of the measure, Premier Hepburn and Hon. Paul Leduc, minister of mines, who is piloting the legislation through the house, stressed the urgent need of quick passage.

Second reading followed defeat of an opposition amendment and an effort to censure Speaker N. O. Hipel for alleged partiality.

Bookings For Churchill

Winnipeg. — Advance reports from two steamship companies agree well for Churchill's 1936 navigation season. Transportation officials have announced increased bookings from continental ports to Manitoba's northern seaport indicated a prosperous season this year.

ATTACKS PREMIER

Sir Austen Chamberlain, famous British statesman, who attacked Premier Baldwin during a debate in the House of Commons. He stated Mr. Baldwin should not be made head of the Committee for Imperial Defense, and drew attention to the Prime Minister's errors.

Pilots Not Qualified

Says Not Enough Pilots To Operate Mail Service

Vancouver, B.C. — Canadian pilots are not qualified to operate an efficient air mail service similar to that in the United States without further training, Wing-Commander D. R. McLaren, manager of the Pacific division of Canadian Airways, Ltd., declared in addressing University of British Columbia students.

"There are not five men in Canada to-day who are capable of operating the radio-controlled, high-speed planes used in the United States air mail service," he said. "As aviation advances in the Dominion, however, we can expect much greater efficiency."

British Bomber Crashes

Two Accidents During Exercises By Royal Air Force

London. — Three men were killed and three more were missing and feared drowned after night bombing exercises by the Royal Air Force resulted in two accidents.

Two airmen and one sergeant, died in the crash of a bomber near Petersfield, Hampshire. A short time after another British bombing plane fell into the English channel near Le Havre, France.

The bomber which met disaster over the channel sank after float for half an hour. It carried a crew of four men, one of whom succeeded in swimming to shore.

ONE THRONE IN THE HOUSE OF LORDS

A change of poignant significance has taken place in the House of Lords at Westminster. On the royal dais behind the woodwork for many years there have been two thrones, one for the King and the other for the Queen, and a chair for the Prince of Wales. Now there is only one Throne. Here is a view of the Throne, showing the wonderful carving behind it.

Boost In Export Trade

Increased Exports To Britain And United States For January

Ottawa. — Citing figures of increased exports to the United Kingdom and the United States for January, compared with January, 1935, Hon. W. D. Euler, minister of trade and commerce, declared in a statement there had been a "sharp advance" in trade with these two countries. "Exports to the United Kingdom in January amounted to \$21,682,840 compared with \$16,611,036 in Jan. 1935, an increase of \$5,071,804 or 30 1/2 per cent," the minister said. "Exports to the United States amounted to \$20,129,564 compared with \$17,529,101, an increase of \$2,600,463 or almost 15 per cent."

The minister stated that "contrary to the expectation of opponents of the reciprocity agreement with the United States, the opening up of trade with that country had not affected adversely Canadian trade with the United Kingdom. On the other hand, exports to the United Kingdom had increased at an even greater rate than the United States."

New Mineral Salt Bed

Drouth Bares Large Deposits In North Dakota

New York. — The great drouth and 68 federal relief workers uncovered some \$335,000,000 worth of new mineral salts in North Dakota dried lake beds, the American Institute of Mining and Metallurgical Engineers was informed.

The discovery was eight deposits of glauber salt, or natural sodium sulphate, a chemical used in the pulp and paper industry, and now largely imported from Canada. The new deposits were found in three North Dakota counties—Williams, Divide and Mountrail.

The engineers were informed about 20,000,000 tons of the mineral has been located, and the market price of the imported mineral now runs up to \$18 a ton.

Study Elections Act

Committee To Be Formed To Suggest Amendments

Ottawa. — A special committee of the House of Commons will be formed soon to study proportional representation; the alternative vote in single-member constituencies; compulsory registration of voters, and compulsory voting. Hon. Ernest Lapointe, minister of justice, has given notice he will move for appointment of such a committee to study the Dominion Elections Act and the Dominion Franchise Act and suggest amendments to these two statutes.

URGE PLAN FOR PENSIONS TO BEGIN AT AGE OF 60

Ottawa. — Monthly pensions for Canadians who reach the age of 60 and voluntarily retire from their jobs to make room for younger men and women, met a varying response in the House of Commons.

The pension plan was urged by Abraham Heaps (C.C.F., North Winnipeg).

There was no exact sum fixed as the proposed monthly pension. Mr. Heaps would like to see it as high as \$50 a month, but admitted the drain on the treasury would be too great. Mr. Woodsworth specified the pension should be on some high plane, giving security to worn-out men and women.

As the means of paying for the scheme, Mr. Heaps suggested "a limited form of controlled inflation," based on the potential wealth of the country. He said the 1931 census showed there were \$70,428 men and women in Canada 60 years of age and over who would be eligible for pensions.

The Winnipeg member moved the following resolution:

"Whereas there exists in Canada an acute unemployment situation; and, whereas, it is desirable as many as possible be absorbed into the useful industrial life of the Dominion;

"Therefore, be it resolved, that in the opinion of this house, the government be requested to immediately introduce legislation granting adequate retiring allowances to all citizens over 60 years of age, thereby giving an opportunity to large numbers now unemployed to be reabsorbed into useful productive activity."

Mr. Heaps referred to the old age pension scheme as one of the most beneficial acts ever passed by parliament.

The old age pension act was working well but the age limit of 70 was too high, considering other countries. "I observed during the last election," Mr. Heaps continued, "the present leader of the opposition (Mr. Bennett) came out in favor of old age pensions at the age of 60 and thought it would be a good thing."

Prime Minister Mackenzie King had said the Liberal party would war against poverty and adversity. He hoped the Liberal government would not be too late in starting the war.

Cheated Out Of Birthdays

Mayor Of Ottawa To Celebrate 11th Birthday On Feb. 29

Ottawa. — Announcement of Mayor Stanley Lewis, of Ottawa, that he will celebrate his "11th" birthday on February 29, although he is 48 years old, has brought a sad-truth to light, he is not alone in his plight. From Montreal, Halifax and Winnipeg letters have arrived from persons of identically the same age, sympathizing with a fellow birthday-misser.

Mrs. Rose Wansborough, of Winnipeg, explains some of the details in her letter to the mayor. "In 1900 I so well remember the disgust of my twin-sister and myself upon being informed that we did not have a real birthday that year, as February 29 is eliminated at the new century. It was an eight-year wait that time!"

Mayor Lewis says he will remember that, eight-year wait and insists that next time it happens, which will be several hundred years from now, he will celebrate his birthday just the same.

The mayor's birthday party this year will take place at the city's largest theatre and the price of admission is one new pot or kettle per person. Next day they will find their way into the homes of the needy.

Granted Extra Leave

Ottawa. — Returned soldiers in the government service will be given 11 days extra leave with pay this summer to enable them to take part in the Vimy pilgrimage. Secretary of State Rinfret announced in the House of Commons, replying to Thomas Reid (Lib., New Westminster). This leave will be in addition to the ordinary holiday leave of three weeks.

GOODS AND SERVICES THE REAL WEALTH OF ANY COUNTRY.

Social Credit does not mean \$25 a month in monetary basic dividends, W. E. Hayes, the member of the Legislature for Stony Plain Constituency, told the Legislature last week.

"What political party whose conscience is dictated to by the financiers even thinks or cares whether a man gets food, clothing or shelter?" the member queried, in leading up to his declaration. "They are so grasping and selfish they would shut off the very air we breathe if it would declare more dividends for their creditors."

Then he declared: "Social Credit has been represented by these men and by the greatest part of the press as a system by which the government will distribute to the citizens a monthly dividend of \$25—money."

"This disjointed definition of Social Credit and the scornful questions appended both go to show that these men and the press are totally ignorant of what they are telling or publishing."

"Goods and services represent the real wealth of any country—not any \$25 money. Money should be the medium of moving real wealth, but instead it lowers production to the level of purchasing power. Social Credit raises buying power to the level of consumption. Which is the more sensible?"

He added: "Social Credit aims to control the credit of the country and make all consumers partakers of the result of that process. Call it dividends, money or what you wish, so as it gives us purchasing power for the goods we need."

FOUR THOUSAND YEARS.

"The poor man hath no strength to save himself from him that is stronger than he." This ancient Egyptian proverb was taken as a text by John T. Hull of Winnipeg, in a recent radio talk. There you have the key to all the injustice endured by the man on the land in the thousand yesterdays and today, Mr. Hull said. Agriculture has been the slave of civilization because its very nature made it socially weak and the easy prey of the socially strong.

The ancient empire of Babylonia, in its code of laws promulgated about four thousand years ago—the code of Hammurabi, the oldest in the world—provision is made for relief of farm creditors in the event of crop failure. No interest could be charged when harvests were destroyed.

Solon of Greece 2500 years ago made fame and immortality by wiping out all farm mortgages and starting the agriculture of Greece out on a clean sheet.

You may ask: Why all this rummaging into the fields of the ancient past? Simply to make a connection and run a straight line 4000 years long and show you agriculture at the beginning. You know all about what it is like at this end of the line. Do you notice much difference? Hardship, exploitation, indebtedness, relief and debt adjustment at both ends of the line—4000 years of it.

Organisation and co-operation, Mr. Hull stated, gives us the key to the economic problems of Canadian agriculture. Without these it will never achieve its rightful place in the economic edifice of the nation, for "The poor man has no strength to save himself from him that is stronger than he."—Alberta Wheat Pool Budget.

MISERABLE? WEAK?

No need for girls or women to suffer from periodic pain, headache or indigestion. Many find that Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. Lillian Batey of 42 Myrtle Ave., Wellesley, Ont., said: "I felt so weak and rundown before I used Dr. Pierce's Favorite Prescription. I had to force myself to eat, and my stomach almost became upset as often. But this tonic not only did to these complaints for after I used it I felt just as good as could be. I am now the joy of my druggist again! Her aid, taken 30 cts. Large size, tablet or liquid, 11.50. Write to Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice."

FLEMING'S FOLLY
—BY—
LAWRENCE A. KEATING

CHAPTER VII.—Continued

He avoided her glowing eyes. "I don't know if you could spare the money. And suppose somebody hurt you? I'd never forgive myself!"

The visitor cleared his throat. But she turned on him, drawing herself to full height. "Mr. Berrens, your offer is not acceptable because Link—"

—Mr. Fleming—has already agreed to build the dam. He has made a contract—"

"A contract?"

She eyed Berrens a moment, then slowly turned back to Link. "You gave your word. Isn't that as good as anything written?"

"Sure it is. But—"

"Your word to join me in building the dam. What if we do have to wait till Spring? It's burst out. You and I talked about this in letters before I came home. We determined to build a dam to prove irrigation will work. Well, you and I became partners. And I won't let you draw out of that, or sell to some company that will do the very thing you want to do to Silver Creek. No sir!" Helen cried, and stamped a small foot to the floor until her spur jingled like the clink of silver in a bag. "We're partners, and partners we stay!"

He raised himself on his elbow, Berrens started to say something but Link's sharp gesture stopped him. There was a new, strange light in his eyes that had not been there before. Despite the shining glare that covered his face, and the total lack of eyelashes or eyebrows, enthusiasm and something deeper, more lasting, dwined in his look.

"Say! I'd sure like to be partners with you a long time after we build—"

His words were drowned in a crash. Dumbfounded, youth and girl swung to view the bunkhouse window that had been shattered by G. I. V. Berrens' hurtling body. At sound of running steps that entered the bunkhouse, and a stentorian voice that boomed at them, they swung back startled.

"Link!" bawled Sheriff Ames Stephen as he poised, sixgun in hand. "I'm after the gent that bought dynamite at Sam Pickett's store yesterday. Yeah, an' a Winchester and slugs too. Gold teeth in his face; short, wears a coat like a horse blanket. I bet he's the hombre shot Torney and mebbe salted yore stove!"

Seconds ticked away before they comprehended. Fleming, crowded painfully out of his bunk to stand awaying distantly. "The window, Sheriff! And—gosh, get him! I'm depending on you, Ames! Get the job, 'cause we sure don't want him loose when we build that dam!"

CHAPTER VIII.

Three men who leaned indolently against the section front of Sam Pickett's general store in Linkville exchanged significant, knowing looks. By common consent they returned their eyes roadway to watch two riders whose mounts trudged with lowered heads through the ruts of Main Street.

One link, stable-chinned, loafs, tumbled for a match to rekindle his pipe. "Firm o' Hamilton & Fleming's come to town, boys."

A companion shifted his chew and spat into the street. "Can't be they're lackin' money again?" he questioned sarcastically. "Link started out like he'd corraled all the dough in the state. Anyhow, he must've figured he had enough to throw away a fortune on the engineering marvel o' the Goldam West!"

They chuckled at this wit, their derision carrying plainly to the tall square shouldered rider. Annoyed, fitted across Link's weather-beaten countenance, and he glanced quickly at his companion. But the quiet smile from the shadow of her Stetson's frayed brim was reassuring. Torney. They ignored the loafers and rode on, at length turning their mounts toward the hitchhail before the claphash straggled Linkville whose broad front window was let-

tered. "Stockmen's Bank of Rawhide."

The easy grace with which Helen Hamilton alid from her saddle did not escape Fleming's admiring gaze, nor the movement of her willowy figure as she stooped under the rack and straightened on the plank side-walk. In buckskin divided skirt, worn but carefully blacked boots with little spurs jingling as she walked, peaked Stetson, and a pongee blouse, she presented a picture which more than one man in Boone County was prone to view with keen appreciation.

Link dismounted and fastened his horse's reins as she had already fastened those of her pinto. Helen had paused at the window of Irv Lane's jewelry store, and he moved to her side. His interested eyes sought the objects of her attention, several diamond solitaire rings priced from one hundred to five hundred dollars in front of which rested a card, "Special—20% Off."

Thrusting one hand into his trousers pocket, Link worked a ten and four-one dollar bills into a pulp ball. Hastily he indicated a ring whose stone flashed brilliant red and blue darts more vivid than those of its competitors. "That's a nice lookin' one."

She cocked her head to calculate the ring's effectiveness. "Yes. It's the very nicest there."

In the silence that ensued Link's eyes roved the window display downward to Helen's slender, capable left hand at her side. There was a look of absorption on his boyish face as he shifted weight. Unexpectedly their eyes met, but Link's fingers crushed the money in his pocket into a harder, smaller sphere.

"That ring'd shore look nice on yore hand," he ventured. "I mean, it wouldn't be half good enough, but I'd look—"

He checked himself. "Well," Link shrugged, "when our dam begins to make alfalfa and stuff grow in that wasteland, maybe Irv Lane'll make a sale." He hesitated, summoning courage. "Would you be pleased?"

Helen tucked a wisp of chestnut hair under her Stetson. Her eyes met his, but sought again the display of jewelry while her cheeks colored rosy. "I don't know you, felt—I mean, you never said you wanted—"

"Say, it must stick out all over"

2 Things to Do TO EASE COLD INSTANTLY

Discomfort and Ache Go Almost Instantly This Way

1. Take two "Aspirin" Tablets. Make sure you get "Aspirin."

2. Drink a full glass of water. Repeat treatment in 2 hours.

Instead of taxing your system with strong medicines for a cold, try the way pictured above—the modern, easy way. Your own doctor will approve it. And it takes hold of even a bad cold almost immediately. The "Aspirin" you take will start combating your cold internally at once; if throat is sore, crush and stir 3 "Aspirin" Tablets in a third of a glass of water; gargle twice. Do not rinse mouth.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

DEMAND AND GET "ASPIRIN"

"That reminds me, I must get a few things about at Pickett's store."

(To Be Continued)

Little Helps For This Week

The cup which my Father has given me, shall I not drink it? John 18:11.

Every sorrow every smart, That the Eternal Father's heart Hath appointed me of yore, Or hath yet for me in store, As my life flows on, I'll take Calmly, gladly, for His sake.

The very least and the very greatest sorrows that God suffers to befall thee proceed from the depths of His unspeakable love; and such great love were better for thee than the highest and best gifts He has given thee, or could ever give thee, if thou couldst but see it in this light. So if you are cold, if you are hungry or thirsty, or if others vex you by their words or deeds, or whatever happens to you that causes you distress to rise, it will all help to fit you for a nobler life.

Would Protect Animals

The Ottawa Humane Society, endorsing a like request of the British Columbia society for the prevention of cruelty to animals, decided to write the minister of justice to amend the protection of animals act, 1911, to make it possible to deny a dog license to any person found guilty of cruelty to dogs.

About the only book that has not yet been "moevized" is the dictionary.

Tallors of Spain have drawn up a "black list" of slow-payers.

Scotland's new national park will cover 100 square miles. 2139

FREE!

Boys send for this **HOCKEY BOOK**

and AUTOGRAPHED PICTURES OF YOUR FAVORITE PLAYERS

Every boy will want this book—"How to Play Hockey." It tells you everything you need to know about the game, and contains a list of "CROWN BRAND" and "ELLY WHITE" CORN SYRUP—both the best back-pose and ad-free—stained and the words "Hockey Book." Mail the label to The Canada Starch Co. Limited, Montreal, and your book will be sent you.

Send in a picture of the front of a bottle of Crown Brand Corn Syrup, and you will receive a picture of your team and address and the picture you want (one picture for each label), and your choice of the following pictures, mounted ready for framing, will be sent to you.

Stony Plain and District.

The hockey game here on Sunday resulted as follows—Selkirk 9, Juniors 4.

Mr Alfred Enders, with his guitar and banjo, won the prize at the amateur contest on Friday night. The 1st prize in the oratorical contest went to Mr Henry Trapp. The latter gentleman has under consideration an offer from Major Bowes to take charge of one of his units.

The dance in town Friday night featuring Barth's Orchestra was quite a success. The local dancers turned out in full force, and a number of couples were present from outside points.

The hockey game billed for Tuesday night at the Enders rink was postponed, owing to the non appearance of the Tuxies, the team from Edmonton.

Remember the G W Scott sale Thurs. Feb. 27, at his farm half mile south Holborn school.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

BUTTER AND EGGS WANTED at The Royal Cafe.

Ask "Joe."

A report is in circulation in Edmonton that interested bachelors may learn something to their advantage if they call on Mayor Clarke, who has been asked by a Toronto girl to assume the role of Cupid. The girl, 24, and weighing 165 pounds, wants a "northern rancher or a Mountie" for a husband.

Pensions Come High.

Old age pensions at the present rate and conditions of payment are expected to cost the Federal Government over a million dollars more in the next fiscal year. The vote last year was \$16,400,000 to pay the Dominion's share. For next year it is \$17,500,000.

Inga Elections.

Elections for Councillors in Inga Municipality were held in two of the Divisions on Saturday last, the 22nd.

In Division Two, where Councillor H Summerfield was seeking re-election, the vote stood

James Eatock Jr. 63
H H Summerfield 61

In Division 3, where Councillor Akin had retired, the contest was between two new candidates, the result being

Alphonse Wagner 54
A H Solinke 27

1 spoiled ballot.

Spruce Grove Municipality.

Nominations for councillors in 4 divisions of Spruce Grove M. D. were held last week, and resulted as follows—

Div. 1, Messrs Latimer and Bailey nominated.

Div. 3, Councillor T Wudel by acclamation

Div. 5, M Larue, by acclamation.

Div. 7, C T Tufford, by acclamation.

Election day is Thursday, Feb. 27.

Change on Elections.

Candidates for municipal honors will be debarred from being nominated if they are in arrears of taxes to the municipal district, according to a bill to amend the Municipal District act, brought up in the Legislature, sponsored by Hon Chas. Cockerott, Minister of Municipal Affairs.

Parking in High Schools.

Students who "make the High School course a lifetime occupation" will be the objects of an investigation by Supt. Buchanan of Calgary schools. At a recent meeting of the school board it was decided Mr Buchanan should find out how many students were "parking" at school. Trustees had urged charging a fee to the board revenues from such students.

The School Act requires school boards to provide only 4 years' schooling for junior matriculation work and 5 for senior matriculation.

Wheat Pool Farmers Jubilant

Federal legislation to equalize prices paid Pool farmers for the crop of 1930 to 80c per bu. will mean the distribution of between a \$1,500,000 and \$2,750,000 for Alberta farmers. About 27,000 farmers in this province will participate. In 1929, when the wheat markets collapsed, the initial payments had been out to 55c and later to 50c. The Pools had for 4 years pressed for settlement of their claim that the difference, totalling over eight million dollars extra said to have been realized at the 60c level, be paid such growers as received loss.

Snow-blocked Roads Did It.

According to an announcement made by the Provincial Secretary discounts on auto licenses will be granted this year, the same as in 1935. This announcement was calculated to reassure motorists who feared that altho unable to use their cars until late in the year they would receive no allowance.

Licenses bought after April 1st will get a discount of 20 p.c.; after July 1, 40 p.c.; and after Nov. 1, 75 per cent. Continuance of the 1935 discount system was decided upon because the sale of car licenses since Jan. 1 have fallen far below last year's figures for the same period, due to snow blocked roads throughout the Province.

The 1936 license will expire with the calendar year.

No Response.

(Edmonton Bulletin.)

Mr. John Irwin, Conservative member of the Legislature for Calgary, is a realist. In a five-minute speech he put it up to the supporters of the Government to show their faith in the coming of the dividends they had spent a week and a half promising to their constituents.

Mr Irwin offered to accept half his seasonal indemnity in Social Credit dividends, whenever these are issued, if the other members of the House would do the same.

There was no response to that invitation. No reply was made to it, no comment offered. The debate ended, because no Government member choose to say anything.

Silence of course meant refusal. It could mean nothing else. The offer could not be accepted save by expressed consent of the majority members. There was no consent coming. They stood pat for collecting their indemnities in cash on the line.

Now all the reader has to do is to guess what that signifies.

Plays Fair.

An editor plays fair, remarks a contemporary. When he prints a letter that calls him an ignoramus he always corrects the spelling and punctuation.

Quebec Winter Sport Mecca

Premier dog-racing event in North America, the International Dog Derby at Quebec City on February 10-11-12 is expected to attract hundreds of winter sports enthusiasts from Canada and the United States to see the leading members of the two countries in competition and to enjoy the skating, tobogganing, sledding, and curling country around the famous Chateau Frontenac. An interesting dual is expected this year between Harry Wheeler, of St. Jovite in the Laurentians, champion last year, and Orville Cartier, of Quebec City, who defeated Wheeler this year in Lac Beauport. New Hampshire annual event. A starting point to this event in Quebec City is the annual golf competition held about the same time at Quebec, N.S. in the New Brunswick Playground of the West. Both are sponsored by the Canadian Sports Society.
